

## Glass BLOCK

Discover fresh design possibilities with WorldGlass. In addition to our classic clear blocks, we offer unique dichroic and colored glass blocks. These versatile products can be incorporated into any project resulting in both functionality and a visually spectacular appearance, granting designers the flexibility demanded by modern architecture.

Glass blocks are multifunctional, useful in interior and exterior walls, flooring and ceilings, and work particularly well when integrated into curved surfaces. Some of the most popular applications include dividing walls, shower enclosures, desks and furniture and as accent pieces. They serve as both structural members and as décor; in fact, they are so strong they can be used as storm or basement windows. Their durability makes them perfect for both commercial and residential use, offering unlimited design potential. WorldGlass glass blocks are extremely practical, cost-effective and easy to maintain. Because they transmit light, these glass blocks save energy and result in brighter, more welcoming rooms.

### **Exclusive Dichroic Glass Blocks**

WorldGlass provides an exclusive line of dichroic glass blocks. The distinctive appeal of dichroic glass lies in the difference between the transmitted and reflective colors inherent in the glass itself, both appearing as completely new shades. The use of dichroic glass in architectural design is becoming a widespread trend, and dichroic glass blocks from WorldGlass are a practical and affordable design solution for residential, commercial, and even industrial construction.
