## LEAD ACRYLIC

Ultraray Radiation Protection offers shatter resistant lead acrylic plastic in six thicknesses/lead equivalencies (lead equivalency range from 0.3mm to 2.0mm).

---

Lead acrylic provides excellent light transmission with effective radiation protection. Additionally it is easy and safe to cut, drill, and machine.

If you require customization or machining of lead acrylic, our state-of-the-art in-house machining department would be more than happy to assist you.
