
LEAD GLASS

Ultraray Radiation Protection offers an extensive line of lead glass for viewing windows, door lites, control booths, mobile barriers, and more.

Our lead glass is the industry choice due to its high-grade optical material, visual clarity, greater scratch resistance, and strength without compromising lead equivalency. Absolute transparency allows observation of the room as it provides full protection against radiation.

Four major types of doors are available:

- Available in standard and custom sizes
- Optically Clear – Not Yellow
- High light transmittance
- Does not discolour after exposure
- Incombustible; does not emit toxic fumes when cut
- Professional custom crating for drop shipments anywhere
- Optionally laminated for safety glass

***Switchable Lead Glass Available**
